- Editors - Kurt Deketelaere, *University of Leuven*, Larry Kreiser, *Cleveland State University*, Janet Milne, *Vermont Law School*, Hope Ashiabor, *Macquarie University*

DESCRIPTION

Critical Issues in Environmental Taxation provides valuable insights and analysis for legislators, policy makers and academics addressing the challenges of pursuing and achieving environmental goals through taxation policy. It contains pioneering and thought-provoking articles contributed by the world's leading environmental tax scholars representing various jurisdictions worldwide. Their aim is to ensure that by discussing and sharing environmental taxation issues that exist around the world, effective approaches used in one country may be considered and possibly implemented by governmental authorities in other countries. The articles published in this work are based on presentations at the Third Annual Global Conference on Environmental Taxation held in April 2002 in Woodstock, Vermont U.S.A.

TABLE OF CONTENTS

I. Role of Environmental Taxation in the Portfolio of Policy Instruments

1. Environmental Taxation: Why Theory Matters. 2. Comparative Benefits and Optimal Use of Environmental Taxes. 3. Why Pollution Taxes Cannot Replace Command and Control Regulation. 4. The Instrument Choice Game: When Do Environmental Taxes Win?
